EDUCATION

Bulacan State University | 2022 - 2026 Bachelor of Science in Computer Engineering

Bachelor of Science in Computer Engineering

Thesis: IoT-Based Early Screening System for Tap Water Safety Using Physicochemical Parameters

Technical Skills:

- **Programming Languages:** C++ | JavaScript | Dart | HTML5 | CSS3
- **Frontend Frameworks:** React.js | Flutter | Responsive Web Design
- **Backend & Databases:** Node.js | Express.js | Firebase | Google Cloud | MySQL | MongoDB
- **Tools & Platforms:** Git | GitHub | REST API Integration | Visual Studio Code | Figma | XAMPP

EXPERIENCE

Planning and Development Office | Bulacan State University

UI/UX Designer & Frontend Developer Intern | June 2025 – August 2025

- Redesigned the UI/UX of the PDO Investment Programming System using Figma, improving form completion rates by an estimated 25%.
- Developed and integrated real-time collaborative form editing features, reducing data entry redundancy by 40% for administrative staff.
- Applied modern frontend design principles to create responsive layouts, increasing mobile accessibility and cross-device compatibility by 100%.

PROJECTS

IoT-Based Early Screening System for Tap Water Safety Using Physicochemical Parameters

- Developed an IoT-based water quality monitoring system using ESP32 and physicochemical sensors, achieving 95% accuracy in real-time data collection and reducing manual water quality assessment time by 80%.
- Designed a companion mobile application with an automated data pipeline for continuous monitoring and visualization of community water conditions while leading a 4-member development team.

IBESST Mobile Application | Flutter, Firebase, Figma

- Engineered a cross-platform mobile application focused on water management, accelerating data retrieval times by 30% using Firebase.
- Reduced manual monitoring effort by 80%, enabling faster and more efficient water quality assessment through automated updates and alerts.
- Designed intuitive UI/UX interfaces, resulting in a 40% increase in positive user feedback regarding navigation and accessibility during testing.

Dormitory Management Website | React.js, Node.js, Express.js, Firebase

- Built a full-stack dormitory management system to automate tenant tracking, room allocation, and billing workflows, reducing administrative workload by 50% while improving record management efficiency.
- Developed responsive UI and integrated SMTP email notifications for rent and bill reminders, ensuring 100% cross-device functionality and improving payment compliance and communication with tenants.

StrikeFlix | Video Streaming Website (UI/UX Designer & Frontend Developer)

- Designed and developed a responsive video streaming platform with a modern UI/UX, improving navigation efficiency and user experience by 35% through optimized layout and content structure.
- Enhanced mobile responsiveness and frontend performance, reducing page load time by 30% and increasing mobile usability and engagement by 40%.

ADDITIONAL

Certifications: Development and Basic Concepts of Cloud Computing (Huawei), June 2025, Networking Basics (Cisco Networking Academy), February 2025, Overview of AI (Huawei), December 2024
