PROFESSIONAL SUMMARY

Computer Engineering graduating student with experience in UI/UX design, frontend development, and mobile application development. Skilled in creating responsive and user-friendly digital interfaces using modern web and mobile technologies. Experienced in developing web systems, mobile applications, and IoT-based projects with a strong focus on usability, functionality, and user-centered design.

TECHNICAL SKILLS

Languages

- HTML5
- CSS3
- JavaScript
- Dart
- JavaScript
- C++

Frontend Technologies

- React.js
- Flutter Responsive Web Design
- UI/UX Design Figma

Backend Technologies

- Node.js
- Express.js
- Firebase

Tools & Platforms

- Git GitHub
- Visual Studio Code
- REST API Integration

EDUCATION

BULACAN STATE UNIVERSITY

2022 - 2026

Bachelor of Science in Computer Engineering

SAPANG PALAY NATIONAL HIGHSCHOOL

2016 – 2022

Junior and Senior High School

BAGONG BUHAY A INTEGRATED SCHOOL

2010 – 2016

Elementary

RELEVANT EXPERIENCE

UI/UX DESIGNER & FRONTEND DEVELOPER

Planning and Development Office – Bulacan State University

June 2025 – August 2025

- Completed on-the-job training as a Frontend Developer and UI/UX Designer. Redesigned the UI/UX of the PDO Investment Programming System using Figma and modern web technologies. Created responsive and user-centered interface designs to improve usability and accessibility. Collaborated on interface development and real-time collaborative form editing features. Applied modern frontend design principles and responsive layouts for better user experience.
-

PROJECTS

Dormitory Management Website

- Developed a dormitory management website using React.js for the frontend and Node.js/Express.js for the backend.
- Implemented tenant tracking and room allocation functionalities.
- Designed responsive user interfaces for efficient dormitory management

H2Know Mobile Application

- Developed a mobile application focused on water monitoring and management using Flutter and Firebase. Designed intuitive UI/UX interfaces in Figma for real-time monitoring and notifications. Implemented responsive mobile features to improve accessibility and user navigation.

Video Streaming Website

- Created a web-based video streaming platform with video upload and playback features.
- Implemented responsive layouts and smooth user interactions using modern frontend technologies.

Plastimask: Improvised Vending Machine

- Designed and developed a vending machine prototype that dispenses face masks when a plastic item is inserted.
- Used Arduino to automate sensors and dispensing mechanisms.
- Integrated electronic and mechanical components to promote recycling and health safety.

Thesis Project: Water Quality Monitoring System with IoT-Based Sensor Integration and Mobile Monitoring Application

- Developed an IoT-based water quality monitoring system using ESP32 and multiple environmental sensors for real-time data collection.
- Designed and implemented a mobile application for live monitoring of sensor data, improving accessibility and user awareness.
- Enabled real-time tracking and visualization of water conditions in the community

SEMINARS & TRAININGS

PANDAY: Shaping Leaders Beyond Code

- Learned the importance of leadership, responsibility, and mindset development beyond technical skills.
- Developed awareness of being proactive, accountable, and purpose-driven as a future professional.

SPEAK UP TO STAND OUT: Building Strong Communication Skills

- Gained understanding of effective communication, active listening, and confidence in expressing ideas.
- Improved awareness of communication’s role in teamwork, collaboration, and professional growth.

LEARN, BUILD, LAUNCH: Modern Web Development Fundamentals

- Strengthened understanding of modern web development from design to deployment.
- Gained insight into building functional and user-centered web applications using current technologies

Tick Tock... It’s Time to Take Control

- Learned practical time management strategies for organizing tasks and improving productivity.
- Developed awareness of discipline and work-life balance in academic and professional settings.

DevX: Turning Innovative Ideas into Impactful Applications

- Gained insight into transforming ideas into real-world applications through development and collaboration.
- Strengthened understanding of innovation, problem-solving, and the social impact of technology.

LEVEL UP: Beyond the Degree – Labor and Employment

- Learned basic labor rights, employment responsibilities, and workplace professionalism.
- Gained awareness of preparing for the workforce with knowledge of fair employment practices.

UPLINK: Building Systems Beyond Servers

- Learned that modern systems integrate cloud services, networking, and data handling beyond traditional servers.
- Gained understanding of scalable system design and the importance of continuous technical skill development.

CERTIFICATES

- Networking Basics (Cisco Networking Academy)
